

PURGEL

cleaner / conditioner for dispensing systems

What is PURGEL ?

PURGEL is a cleaner / conditioner for dispensing valves. It is designed to push out or purge solder paste and surface mount adhesives from dispensing systems, cleaning and preparing them for storage.

What is the advantage ?

- _ No more time-consuming disassembly of high precision, fragile and expensive dispensing systems
- _ Lubrication for safe long storage conditions
- _ Blue colour for easy distinguishment

How does it work ?

1. replace current product syringe with PURGEL
2. purge the system until only PURGEL exits
3. system is now clean and prepared for storage

To start regular production again :

1. replace PURGEL syringe with product syringe
2. purge the system until only product exits
3. system is now ready for production
