

IF DENSITYMETER

Advantages

- High accuracy density : 0.001 g/cm^3
- Easy scale to read.
- Alcohol thermometer : no mercury!
- Accuracy temperature : 1°C
 2°F
- The measuring of the density and the temperature at the same time makes the interpretation of the results easier.

Density range : 0.800 to
0.850 g/cm^3

Temperature range : 0 to 30°C
32 to 86°F
