

INTERFLUX® LECTRO LOTION

DESCRIPTION

Interflux® Lectro Lotion is a specially formulated hand cream for electronic assemblers. It has a non-greasy formula which does not contain silicone, lanolin, mineral oil or other materials which would adversely affect the solderability of components and circuit boards. Unlike most hand creams, it also contains no formaldehyde.

Interflux® Lectro Lotion is formulated with Aloe Vera which promotes healing of burns and chapped skin. It contributes to the removal of sticky rosin and oils received from the soldering process.

Use of Interflux® Lectro Lotion eliminates the need for other hand creams which may not be compatible with the soldering process.

PHYSICAL AND CHEMICAL PROPERTIES

State	:	viscous liquid
Specific gravity	:	1,02 g/ml
Colour	:	light blue
Odour	:	pleasant
Solubility in water	:	100 %

SAFETY

Interflux® Lectro Lotion is extremely safe for use. However, Material Safety Data Sheets are available upon request.
